# VNS Health HELPS

Automated Tasking for  
Personal Care Services

A VNS Health Management  
Services Organization product

# VNS Health HELPS

## Consistent and Accurate Recommendations for Personal Care Service Hours

**VNS Health HELPS** is a fast and easy-to-use tasking tool, that automates personal care recommendations with the highest level of accuracy and assurance.

**HELPS** optimizes personal care planning for members, saving your team valuable time and expense by delivering precise, data-driven results.

# Functional Risk Analytics Save Time and Improve Performance

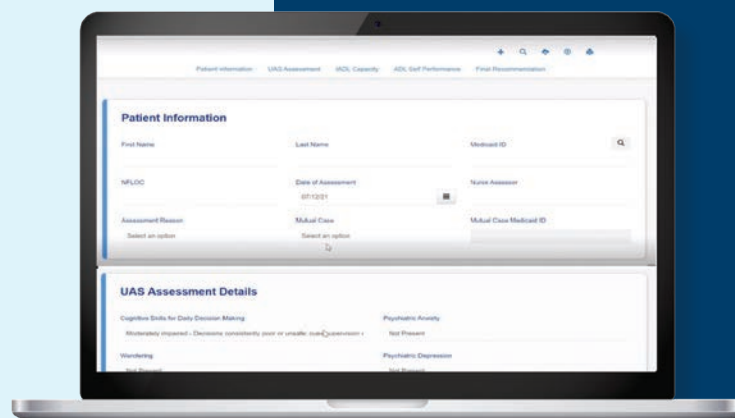

**HELPS** uses a proprietary algorithm to analyze Uniform Assessment System results and to generate the most reliable, consistent recommendations for personal care hours.

With **HELPS**, your team can create individualized care plans using trusted, clinical evidence to help make the best personal care decisions for members.

- **Fast and powerful** tasking tool enables your team to create extremely accurate PCS plans in less time
- **Evidence-based recommendations** reduce subjectivity and standardize outcomes that more accurately match member needs
- **Consistent, reliable results** for stronger alignment of risk scores to PM/PM utilization
- **Custom reporting** to track and manage program performance

**+70,000  
Authorizations**

**VNS Health HELPS** has successfully guided thousands of consistent, evidence-based personal care evaluations.
